

Pavel Sergeev

Senior Software Engineer · Full-Stack & AI Integration

Bangkok, Thailand · remote-friendly sergeevpasha90@gmail.com

+66 82 338 5321

Senior full-stack engineer with 8+ years shipping production SaaS across property-tech, health-tech, fintech and e-commerce. I own systems end-to-end — architecture, backend, frontend, infrastructure-as-code and the AI layer on top — and I'm the person teams hand the hard problems to: high-load data pipelines on ClickHouse, ultra-low-latency request handling with Nginx + Lua, complex third-party integrations (Airbnb, VRBO, Google, payment providers), and LLM features that actually reach users — RAG assistants over large knowledge bases, real-time multilingual translation, ChatGPT-driven automation. Core stack: PHP/Laravel and Go on the server, Vue/React on the client, PostgreSQL underneath, AWS around it. Strong on SQL optimization, serverless and microservice design, and on turning a vague product idea into a system that runs quietly in production for years.

EXPERIENCE

IGMS

2023 — now

Senior / Lead Software Engineer

Vacation-rental property management SaaS · Vancouver · remote

- ✓ Integrated **Airbnb, VRBO and Google Vacation Rentals** into one channel manager.
- ✓ Shipped a **website builder** so hosts take direct bookings and skip OTA commissions.
- ✓ Built **dynamic pricing sync** with external revenue-management services.
- ✓ Delivered an **internal RAG assistant** over a large knowledge base plus **instant multilingual translation**; LLM auto-replies for guest FAQs.
- ✓ High-performance stack: **Nginx + Lua** for low-latency handling, **Go** for scheduled jobs, Laravel/Vue core, **ClickHouse** for real-time analytics.

ANDERSEN LAB

2020 — 2022

Software Engineer

Outsourcing — several client products · Moscow

- ✓ **Call-center SaaS from scratch** on Asterisk; complex SQL with triggers and sharding.
- ✓ **Video health-consulting** service on React + NestJS + Lambda; led the move to serverless.
- ✓ **Student housing marketplace** (UK/ES): full IaC with AWS CDK, payments, auto-posting.
- ✓ **High-load ads platform** — Laravel, MariaDB, ClickHouse, Go services; SQL optimization.

Full-Stack Web Developer

Industrial supplier · Yekaterinburg

- ✓ Designed and built a **custom CRM** (Laravel, PostgreSQL, Nuxt, Redis): supplier sync, call scheduling and recording, one-click invoicing and e-signing — **+80% productivity and sales.**
- ✓ **SEO-ready e-commerce shop** on Laravel, MySQL, ELK, Vue.js.

STACK

BACKEND	PHP / Laravel · Go · Node.js / NestJS · Python · Lua (OpenResty)
FRONTEND	Vue.js / Nuxt · React · TypeScript · GraphQL
DATA	PostgreSQL · MySQL / MariaDB · ClickHouse · Redis · ELK
INFRA	AWS (Lambda, CDK) · Docker · Nginx · Linux · CI/CD · IaC
AI	LLM APIs (OpenAI, Claude) · RAG & vector search · Prompt engineering · Agents / tool calling / MCP · AI-assisted dev (Cursor, Claude Code)
PRACTICES	Microservices · Serverless · High-load systems · SQL optimization · Payments · 3rd-party APIs · Agile
